	<p><i>Answer:</i> Barrel-Lock key switch. Very similar to what we have on today's bikes {Softail models)</p> <p>3. <i>What year was the Tri-Glide Ultra Classic introduced?</i> <i>Answer:</i> 2009</p> <p><u>Safety info:</u></p> <ul style="list-style-type: none">• Winter riding tips: Some of these are also used when driving your vehicle.• Pay attention to dexterity in your hands: If you're out on the road and your hands start to become stiff and numb from cold, stopping to run some warm water over your hands or holding them under an air hand dryer can help restore blood flow to your fingertips.• Watch out for black ice: The best way to avoid black ice is to always avoid wet-looking road surfaces if temps are below 38!° Fahrenheit. Bridge, overpass, shady roads.• Maximize Visibility and increase following distance: Look further down the road for hazards, wear bright outer layer of clothing (reflective vest).• Cold tires: Cold weather means colder tires, which equates to a reduction in traction even if the pavement is totally dry and salt-free. While simply riding can increase heat in tires to safer levels, even the briefest stop can cool tires down fast, reducing traction when you get moving again.• Keep phone in plain sight: If you have a phone mount, Easy viewing of your smartphone is one of the best ways to stay safe when riding in the winter. Being able to mount your phone where you can easily see weather: maps or Waze reports of slippery roads can add a higher degree of awareness in the cold.• Stay warm and dry this winter season.• For those who didn't see Kevin's picture on Facebook, he showed a new HOG reflective patch that is highly visible. See Drew if you want to order one.
